

# Reverse osmosis and electro-deionisation.

The efficient way to produce and supply pure water on a centralised purified water supply.

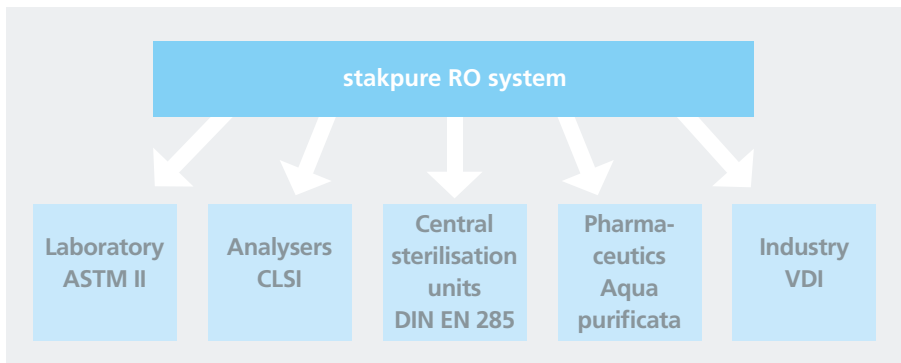

# stakpure reverse osmosis systems. Constant and reliable.

RO systems provide an efficient and cost-effective way of producing a centralised supply of pure water as required in laboratories, health care, pharmaceutical companies and industry.

stakpure reverse osmosis systems are configured to meet specific needs within a capacity range of 20 l/h to 6,000 l/h. This makes it possible to supply individual laboratory and medical systems, floors or even entire buildings. Reliably and always in constantly high quality.

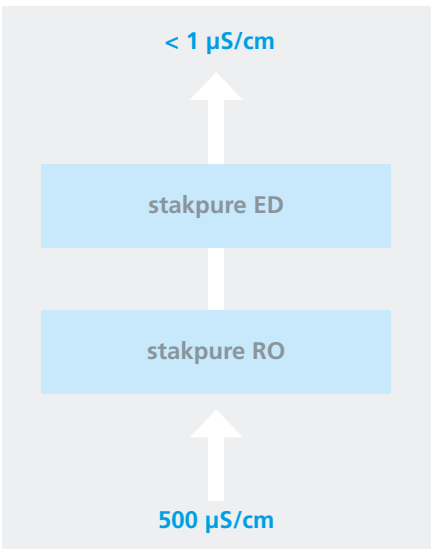

**Typ. rejection rate of a stakpure reverse osmosis system**

Minerals	99 %
Bacteria	99 %
Particles	99 %
Pyrogens	99 %

**Need purified water of an even higher quality?**

In meeting maximum demands on purifying water, an electro-deionisation facility is installed downstream of the RO system to remove any residual minerals. This achieves pure water qualities within a range of 0.067 to 1  $\mu\text{S}/\text{cm}$ . Permanent regeneration of the mixed-bed resins in the ED system also produces an extremely high level of water purity without adding chemicals. This rules out the temporary occurrence of impurities and prevents the system from overloading.

- Benefits at a glance:**
- One central system – space-saving
  - No regeneration costs
  - No use of chemicals
  - Free from particles and bacteria
  - High pure water yield
  - Modular capacity upgrade

# stakpure reverse osmosis systems.

## Compact units for decentralised supply.

### stakpure RO cabinet

Ready-to-connect, compact RO system in a cabinet for wall-mounting. Digital micro-processor controller with LCD display for controlling and monitoring all operating and performance parameters as well as for displaying permeate conductivity. Fully automatic rinsing cycles. Module-based capability of increasing capacity at a later stage.

stakpure RO cabinet	20	40	60	120
Permeate performance at 10 °C	20 l/h	40 l/h	60 l/h	120 l/h
Power consumption	0.30 kW			
Electrical requirements	230/50 V/Hz			
Max. operating pressure	14 bar			
Dimensions mm (WxDxH)	600x400x800			
Weight	45 kg	50 kg	55 kg	60 kg
Order no.	15300020	15300040	15300060	15300120

### stakpure RO ready

"All in one" unit in a cabinet with lockable door and observation window. All components (pretreatment, water softening, reverse osmosis, storage tank with level control and pressure booster) are integrated and premounted ready to connect. Multilingual micro-processor controller with LCD display for controlling and monitoring RO systems. Display of permeate conductivity, fully automatic rinsing cycles, potential-free fault reporting relay. Module-based capability of increasing capacity at a later stage.

stakpure RO ready	60	120
Permeate performance at 10 °C	60 l/h	120 l/h
Power consumption	1.0 kW	
Mains voltage	230/50 V/Hz	
Max. operating pressure	14 bar	
Dimensions mm (WxDxH)	800x600x1800	
Weight	200 kg	210 kg
Order no.	15200060	15200120

# stakpure reverse osmosis systems. For centralised supply.

## stakpure RO easy

Ready-to-connect RO system on stainless-steel frame. Multilingual microprocessor controller with LCD display for controlling and monitoring RO systems. Display of permeate conductivity, fully automatic rinsing cycles, potential-free fault reporting relay. Module-based capability of increasing capacity at a later stage.

stakpure RO easy	100	150	200	300
Permeate performance at 10 °C	100 l/h	150 l/h	200 l/h	300 l/h
Power consumption	0.60 kW			
Mains voltage	230/50 V/Hz			
Max. operating pressure	12 bar			
Dimensions mm (WxDxH)	600x600x1600			
Weight	80 kg	85 kg	100 kg	110 kg
Order no.	15400100	15400150	15400200	15400300

## stakpure RO central

RO-Cabinet version with lockable door and observation window. Multilingual microprocessor control with LCD display for controlling and monitoring RO systems. Display of raw and pure water conductivity with limiting value setting capability and temperature compensation. Fully automatic rinsing cycles, potential-free fault reporting relay. Module-based capability of increasing capacity at a later stage.

stakpure RO central	300	600	900	1200
Permeate performance at 10 °C	300 l/h	600 l/h	900 l/h	1200 l/h
Power consumption	1.6 kW	1.6 kW	1.6 kW	1.6 kW
Mains voltage	380/50 V/Hz	380/50 V/Hz	380/50 V/Hz	380/50 V/Hz
Max. operating pressure	14 bar	14 bar	14 bar	14 bar
Dimensions mm (WxDxH)	800x600x1800	800x600x1800	800x600x1800	1000x600x1800
Weight	220 kg	260 kg	280 kg	300 kg
Order no.	15300300	15300600	15300900	15301200

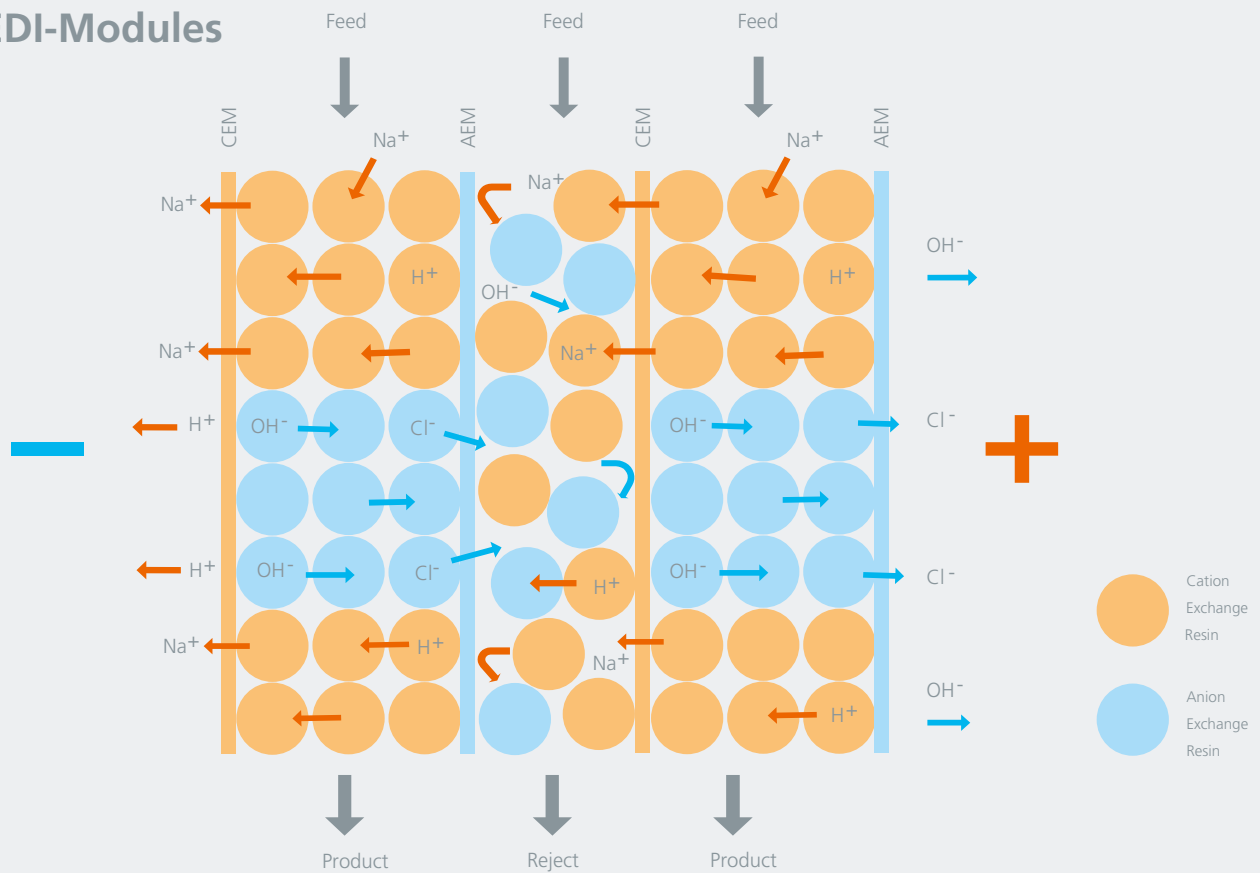

# stakpure electro-deionisation ED. For the highest of demands.

Electro-deionisation combines two processes for producing ultrapure water: the electrodialysis and ion exchanger processes (IEP).

Whereas the conventional ion-exchanger process involves chemically regenerating the resins on a regular basis after longer time use, electro-deionisation continuously regenerates the resins using electric current.

## CEDI-Modules

### Principle and mode of operation:

With electro-deionisation, water is split into H<sup>+</sup> and OH<sup>-</sup> ions by applying an electric voltage within the cells. This creates a process that continuously regenerates the mixed-bed resins without adding chemicals. Ions are held back on the mixed-bed resins and flushed out through selective membranes that only let anions or cations through. This process rules out any occurrence of impurities and the risk of "impure mixed-bed resins" contaminating the pure water that is produced. Electro-deionisation systems produce a constantly high water quality, making them ideal for supplying pure water to entire building wings in the laboratory (ASTM II), central sterilisation units in clinics (DIN EN 285) as well as for many pharmaceutical and industrial applications.

# stakpure reverse osmosis systems.

## With integrated electro-deionisation modules.

### stakpure RO ED cabinet

RO system with integrated electro-deionisation. Cabinet version with lockable door and observation window. Multilingual microprocessor control with LCD display for controlling and monitoring electro-deionisation systems. Display of permeate and pure water conductivity with limiting value setting capability and temperature compensation. Fully automatic rinsing cycles, potential-free fault reporting relay. Module-based capability of increasing capacity at a later stage.

Also optionally available with control unit with touch panel. Programmable control unit for controlling and monitoring entire systems all automatically. Display of all operating and performance parameters with process visualisation. Capability for connecting and controlling external units and relaying measurement readings and fault messages to the building and central services management system.

stakpure RO ED cabinet	80	130	170	270
Ultrapure water output at 10 °C	80 l/h	130 l/h	170 l/h	270 l/h
Ultrapure water quality	0.1 – 1.0 µs/cm*			
Max. operating pressure	14 bar			
Power consumption	0.9 kW			
Mains voltage	230/50 V/Hz			
Dimensions mm (WxDxH)	615x600x1600			
Weight	135 kg	140 kg	145 kg	150 kg
Order no.	17400080	17400130	17400170	17400270

\* depending on feed water quality

### stakpure RO ED ultra

RO system with integrated electro-deionisation and recirculation module (polisher). With digital microprocessor control, see RO ED cabinet. Also optionally available with control unit.

stakpure RO ED ultra	80	130	170	270
Ultrapure water output at 10 °C	80 l/h	130 l/h	170 l/h	270 l/h
Ultrapure water quality	0.067 – 0.1 µs/cm*			
Max. operating pressure	14 bar			
Power consumption	0.9 kW			
Mains voltage	230/50 V/Hz			
Dimensions mm (WxDxH)	615x600x1600			
Weight	155 kg	159 kg	164 kg	169 kg
Order no.	17500080	17500130	17500170	17500270

Order no.	25014000	25014100	25014200	25014300	25014400

## Backflushable fine filter + household water station

Filter combinations with backflushable fine filter and pressure reducer in one unit – DVGW-tested (German Association for Gas and Water). The fine filter prevents foreign particles from being washed in, such as rust particles, hemp remnants and grains of sand. The pressure reducer prevents pressure damage and lowers water consumption.

# stakpure water softening systems.

## For softening water the reliable way.

### stakpure standalone softeners

The System is either volume or time-controlled, for softening iron and manganese-free drinking water, in compliance with the German Drinking Water Ordinance, fully automatic with 5-stage central control valve and microprocessor with integrated blending valve and water meter. Pressurised tank made of non-corroding GFP, including top-quality cation exchanger, built into cabinet container with float valve.

stakpure WEA compact	32	60	100
Capacity at 10°dH	4 m <sup>3</sup>	6 m <sup>3</sup>	10 m <sup>3</sup>
Nominal flow rate	0.32 m <sup>3</sup>	0.6 m <sup>3</sup>	1.0 m <sup>3</sup>
